ACRYLIC POOL WINDOWS - MOVABLE FLOORS

JUST IMAGINE

HOLLAND AQUA SIGHT REALISES DREAMS

BATHING IN LUXURY

Our fully transparent, Plexiglas swimming pool windows give your dream pool a third dimension. The custom-made windows or walls can be integrated into any design. Holland Aqua Sight makes bathing exclusive, from every point of view.

EXCLUSIVE TOUCH

Holland Aqua Sight underwater windows create additional ambience for every space. Whether it's a stunning view of the swimming pool, a large-scale aquarium or a transparent swimming pool wall, creating an overflow: our underwater windows give a unique luxury touch to underwater areas for hotels, health spas, shopping malls and private projects.

TAILOR-MADE TO YOUR NEEDS

Using our cutting-edge machinery, we are able to create underwater windows in any desired size and/or radius. The Plexiglas is versatile so we can easily shape it. When it comes to design, the sky is the limit!

SAFE AND SECURE

The advantages of acrylic compared to glass are considerable. One of them is the strength: acrylic is almost 20 times stronger than glass and will not break like glass does. Besides that, the high insulation value of acrylic underwater windows guarantees stable water temperatures and less condensation. This ensures lower maintenance and energy bills.

BEAUTY IN MAKING

The high transparency of the material does any design justice. Acrylic underwater windows are much clearer than underwater windows made of tempered glass. Our acrylic windows have a relatively low density and are available in large panel surface areas, making them suitable for any situation and design.

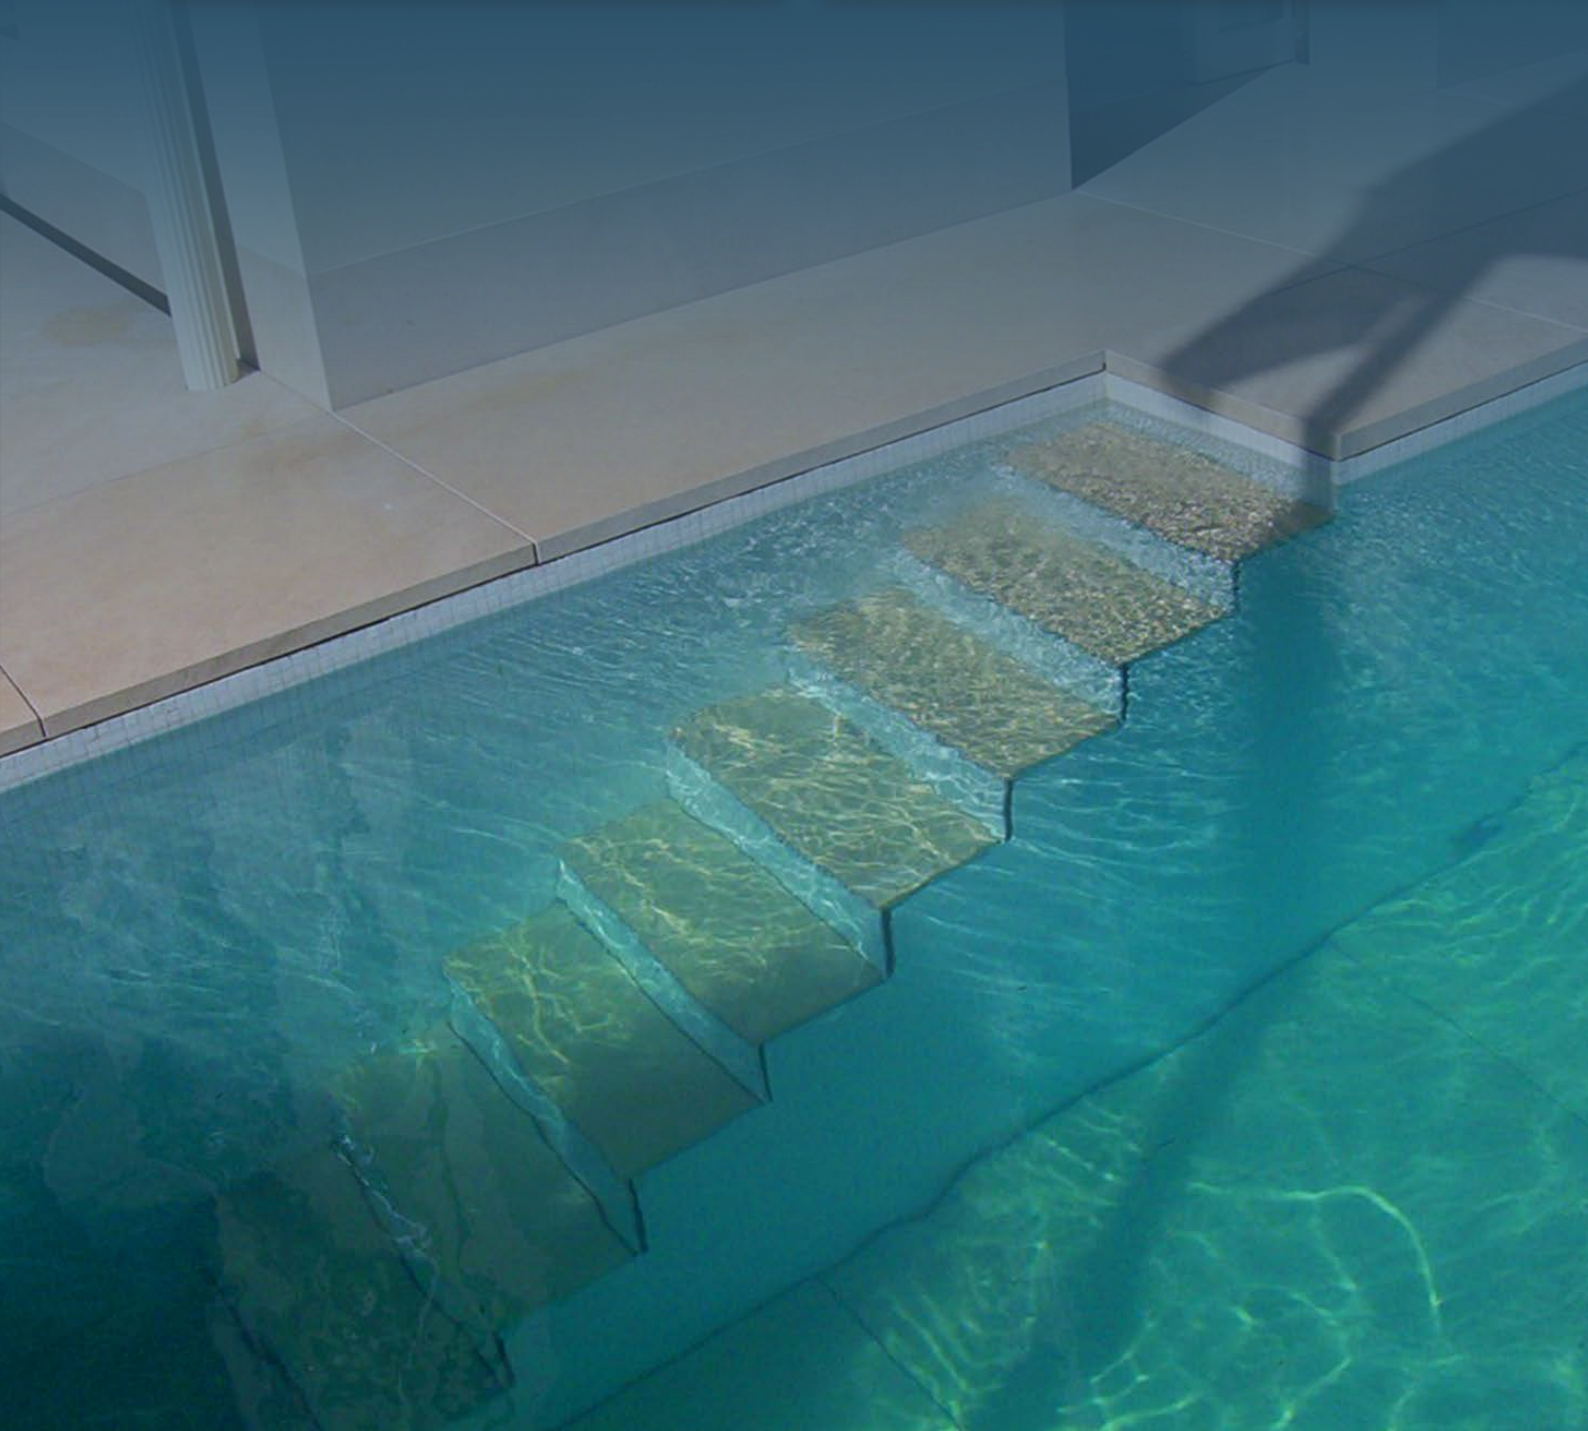

POOL FLOORS TO ANOTHER LEVEL

With a movable pool floor, you can turn your private swimming pool into a safe paddling pool for the kids, a diving pit up to 5 meter deep or even into a terrace where you can give a party or park your car. With a movable floor, you are not losing but saving space because of the extra possibilities in the same backyard or indoor space!

TOTAL CARE WORKFLOW

There are many advantages to involving us in your project from the initial design phase onwards. Together with the architect or client, we are then able to shape the project's design to your personal wishes. After this, our total care concept starts. The Holland Aqua Sight team will help you from A to Z with customized engineering, project management, production, transportation, installation, support, service and maintenance.

A PART OF THE VARIO GROUP

As a part of the Vario Group, we are fully certified in this branch and we know how to realize any project. Visit our website for specific information about our products and all the possibilities or contact us directly for more information.
